FRUIT PAD

less food waste | less CO₂ emission | more added value

Berries and soft fruits are precious and very sensitive. Its shelf life is very limited. Packaging, storage and transport have a decisive influence on this. An efficient fluid management can be the difference between profit and loss.

We optimize the transport, storage and display of berries

FruitPads: The fruity and fresh solution

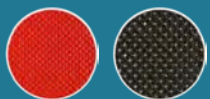

The **FruitPad** for retail packs of berries and soft fruits

Specifically developed for berry packages

Available in different sizes, shapes and colours.

Protection

The pads are designed to have excellent cushioning with minimal raw material.

Breathability

The micro pore structure supports the packaging ventilation system required by soft fruits.

Presentation

Let us showcase your product and increase shelf appeal.

Absorbency

Whether liquid is naturally released or from damaged fruit, FruitPad absorbs from both the surface and the sides.

Hygiene

With rewet almost eliminated, microbial growth and mould is significantly reduced – this is active waste reduction!

Handling

Consistent product parameters result in superior machinability and efficiency.

less food waste | less CO₂ emission | more added value
